

HYDRA® - Hydrant Wrench

NEW

- quick help when something is on fire!

Our latest product: the hydrant valve wrench

offers you safe support when you need it. Usable for open wheels as well as for all-cast aluminium wheels.

In addition, you will find an SW 36 open-end wrench at the grip end to replace the complete valve fitting. A single tool for three applications – so you won't lose time. The **HYDRA®** hydrant valve wrench is made of ultra-light aluminium.

Hand wheel operating wrench for:

- hydrant locking
- pipe risers
- hose distributors
- TS portable fire pump

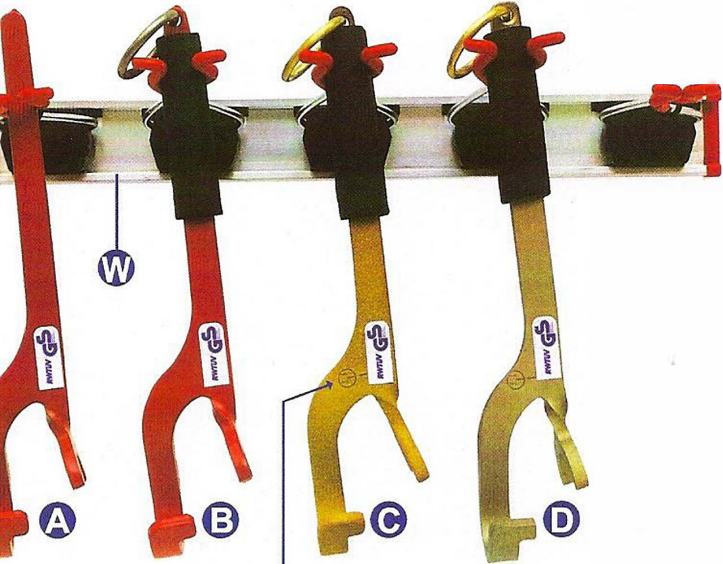

With the following benefits:

- very light (aluminium)
- easy to operate
- several tools in one

SIGA® - Safety Wrench

Unscrews resistant fittings in the twinkling of an eye!

SIGA® Safety Wrenches are tools of maximum quality. Slip-safe in their use, work-optimizing and time-saving.

Due to a well-balanced range of various wrench sizes and types, you will always have the correct wrench for each and every hand fitting.

TÜV-certified and marked with the "certified safety" logo.

For your individual requirements, we offer four **SIGA®** wrench types in the following designs:

- A** as a particularly cost-efficient standard basic model
- B** for higher demands with a rubber handle and extension protection
- C** if required, coated with spark-reduced metal alloy; with a rubber handle and extension protection
- D** designed specifically for danger zones and made of spark-free metal with rubber a handle and extension protection
- W** Tool holder set: consisting of a 50 cm guide rail and 5 tool holders

Only the **KIT** engraving proves that you have the original **SIGA®** Safety Wrench.
